### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

- Claims 10 and 11, line 3, "5" has been deleted.
- Claims 23-26 are cancelled.

### *Allowable Subject Matter*

2. Claims 2-8, 10, 11, 13, 14 and 16-22 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Claims 2 and 4-8

None of the prior art of record teaches or suggests an image forming apparatus comprising a control unit for causing an idle operation of the developer support to be performed at a predetermined timing in a non-print state; wherein the idle operation is a rotation operation of the developer support when a developing bias applied to the developer support is off.

Claims 3 and 4-8

None of the prior art of record teaches or suggests an image forming apparatus comprising a control unit for causing an idle operation of the developer support to be performed at a predetermined timing in a non-print state; wherein the idle operation is a rotation operation of the developer support when an image exposure to an image support is off.

Art Unit: 2852

Claim 10

None of the prior art of record teaches or suggests an image forming apparatus comprising a control unit for causing an idle operation of the developer support to be performed before image formation operation; wherein the idle operation is a rotation operation of the developer support when a developing bias applied to the developer support is off.

Claim 11

None of the prior art of record teaches or suggests an image forming apparatus comprising a control unit for causing an idle operation of the developer support to be performed before image formation operation; wherein the idle operation is a rotation operation of the developer support when an image exposure to an image support is off.

Claim 13

None of the prior art of record teaches or suggests an image forming apparatus comprising a control unit for causing an idle operation of the developer support to be performed each time development units installed in the rotary developing unit are switched; wherein the idle operation is a rotation operation of the developer support when a developing bias applied to the developer support is off.

Claim 14

None of the prior art of record teaches or suggests an image forming apparatus comprising a control unit for causing an idle operation of the developer support to be performed each time development units installed in the rotary developing unit are switched; wherein the idle operation is a rotation operation of the developer support when an image exposure to an image support is off.

Art Unit: 2852

Claims 16 and 18-22

None of the prior art of record teaches or suggests an image forming method comprising the steps of performing an idle operation of a developer support to decrease a density unevenness caused depending on a standing state of a developing chamber portion and an exposure portion of the developer support; wherein the idle operation is a rotation operation of the developer support when a developing bias applied to the developer support is off.

Claims 17 and 18-22

None of the prior art of record teaches or suggests an image forming method comprising the steps of performing an idle operation of a developer support to decrease a density unevenness caused depending on a standing state of a developing chamber portion and an exposure portion of the developer support; wherein the idle operation is a rotation operation of the developer support when the image exposure to an image support is off.

***Prior Art***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- Hama et al. [6,909,858] disclose an image forming apparatus having a rotary developing unit.
